

# Country spaces

**Every country has a space.** Dimensions are:

100 cm wide  
150 cm deep

The stands are furnished with

- A high chair
- A bistro table

The stands will have a nice shawl with the country flag and country name in English.

There are **no walls or structure** around the country space.

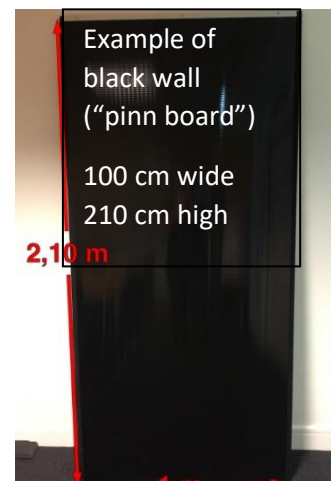

For the background of the stand, you can

either erect a roll-up

or you can ask for a black wall. You can attach posters using blue tack.

Due to space restriction, there will be **no monitors** in the country spaces

→ Please bring a **tablet or use your laptop** instead if you want to show your website, examples of systematic disclosures.

## Displaying documents

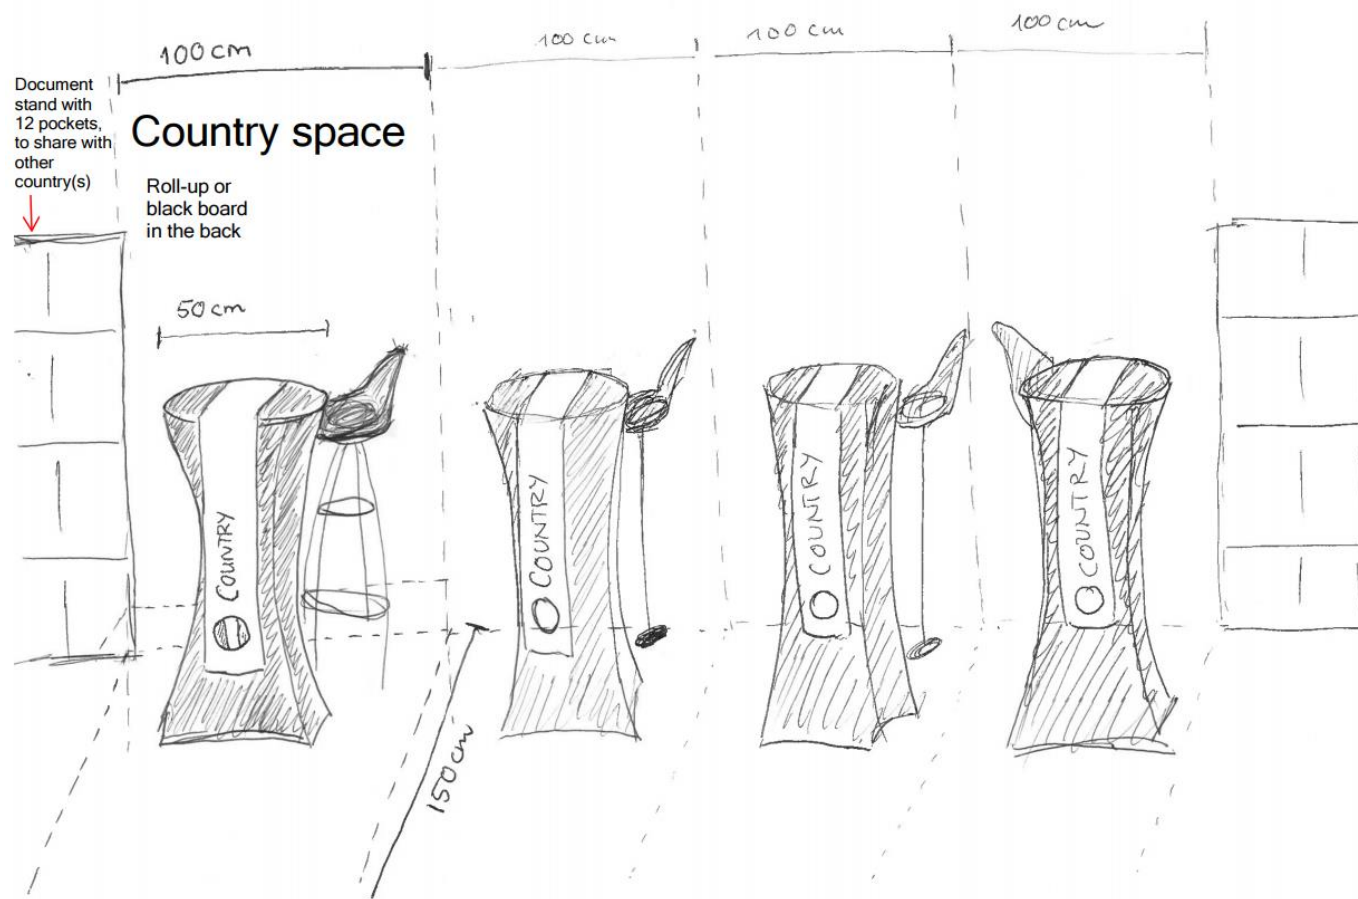

**You will share a document stand with at least one more country.** That means you have 4-6 pockets you can insert publications in.

Please remember that there is very limited **storage**.

**Every country can store one box of publications** in the storage room.

Note that there is not room for boxes for storing materials in the country spaces.

## View of country spaces next to each other

Countries have their spaces next to each other.

There will be document stands available on the margins for countries to share.

You can personalise the background with a roll-up or by hanging posters on a black wall.

Please bring your own tablet or laptop. We cannot provide monitors.

**Countries are grouped together by regions.** The exact allocation of spaces will be shared later.

The National Innovation Exchange will take place on **three different levels**, and hundreds of people will pass by the country stands.

The **pitch corner** is on the gallery level in an open space.
