

# 2019 EITI Standard

## What's new in the global standard?

Building on good practices in implementing countries, the revised EITI Standard represents a further evolution in extractive sector transparency

Learn more at [eiti.org](https://www.eiti.org)

# The 2019 EITI Standard better supports national priorities for implementation by:

1. Clarifying existing requirements

2. Introducing flexibility to reduce the burden of reporting

3. Emphasising comprehensive and regular disclosure of data through existing systems

## New disclosure requirements, expectations and encouragements enable deeper insights into extractive sector data

Environmental reporting

Gender balance

Trades by state-owned enterprises

Contract transparency

Project-level reporting

### When do these changes apply?

Application of the revised Standard depends on the publication date of the report:

Reports published on or before 31 December 2019 can be validated against either the 2016 or 2019 Standard

Reports published after 31 December 2019 will be validated against the 2019 Standard
