

ENVIRONMENTAL DATA DISCLOSURE

CHALLENGES

- **Devil in the Details:** Reconciliation versus simply reporting?
- **Use of Data:** Concerns by stakeholders over use of data.
- **Mainstreaming:** Data exists in silos. Concerns over assurance.

Final Takeaway & Future Considerations

- Alignment with new EITI Standard requirements.
- Need for consensus among competing interests on information to be captured. Limit reporting burden.
- TTEITI to continue including environmental governance indicators and gaps in reports.

EITI Beneficial Ownership Declaration Form

This information is required for Trinidad and Tobago to meet the 2016 EITI Standard which calls for reporting companies to disclose the beneficial owners of all corporate entities that apply for or hold a participating interest in an exploration or production oil, gas or mining license or contract. Please use a desktop computer for the best experience.
