Validation schedule

Maximum period for each step, subject to discussion with the MSG

Deliverable for each step

Recommendations for MSGs

Extension requests

Must be endorsed by the MSG and be submitted prior to the commencement of Validation.

Complete work before Validation commences

Without prejudice to the ability of the Board to exercise their discretion to consider all available evidence, the Validation procedures specify that Validation “should not take into account actions undertaken after the commencement of Validation”.

Written submissions

Stakeholders are encouraged to prepare written submissions which can be made available to the Secretariat, Validator and the EITI Board.

Confidentiality

The EITI will ensure appropriate protocols to ensure that stakeholders are able to freely express their views and that requests for confidentiality are respected.

Legend to the assessment card

No progress. The country has made no progress in addressing the requirement. The broader objective of the requirement is in no way fulfilled.

	Inadequate progress. The country has made inadequate progress in meeting the requirement. Significant elements of the requirement are outstanding and the broader objective of the requirement is far from being fulfilled.
	Meaningful progress. The country has made progress in meeting the requirement. Significant elements of the requirement are being implemented and the broader objective of the requirement is being fulfilled.
	Satisfactory progress. The country is compliant with the EITI requirement.
	Beyond. The country has gone beyond the requirement.
	This requirement is only encouraged or recommended and should not be taken into account in assessing compliance.
	The MSG has demonstrated that this requirement is not applicable in the country.

Satisfactory progress. In order for the EITI Board to conclude that a country has made satisfactory progress, Validation needs to demonstrate that all aspects of the requirement have been implemented and that the broader objective of the requirement has been fulfilled.

Meaningful progress. In order for the EITI Board to conclude that a country has made meaningful progress, Validation needs to demonstrate that significant aspects of the requirement have been implemented and that the broader objective of the requirement is being fulfilled.

Inadequate progress. In order for the EITI Board to conclude that a country has made inadequate progress, Validation needs to demonstrate that significant aspects of the requirement have not been implemented and that the broader objective of the requirement is far from fulfilled.

No progress. In order for the EITI Board to conclude that a country has made no progress, Validation needs to demonstrate that all or nearly all aspects of the requirement remain outstanding, and that the broader objective of the requirement is not fulfilled.

Terminology

The use of the terms ‘must’, ‘should’, ‘required’ in the EITI Standard indicates that an issue is mandatory, and will be taken into account in the assessment of compliance with the EITI Standard.

The use of the term ‘expected’ in the EITI Standard indicates that the multi-stakeholder group should consider the issue, and document their discussions, rationale for disclosure/non-disclosure and any barriers to disclosure. Validation will consider and document the discussions by the multi-stakeholder group.

The use of the terms ‘recommended’, ‘encouraged’, ‘may wish’ and ‘could’ in the EITI Standard indicates that an issue is optional. Efforts by the multi-stakeholder group will be documented in Validation but will not be taken into account in the overall assessment of compliance with the EITI Standard.

The term ‘EITI Report’ in the context of a disclosure mechanism is used as shorthand for the information and data that should be disclosed in accordance with the EITI Standard. The data can be disclosed in the form of an EITI Report, or constitute publicly available information and data gathered or cross-referenced as part of the EITI process.

The EITI (Extractive Industries Transparency Initiative) is a global standard that improves transparency and accountable governance of oil, gas and mineral resources. The standard is implemented by governments, in collaboration with companies and civil society.

Countries implementing the EITI disclose information on issues such as tax payments, licenses, contracts, production and national oil companies.
